

Amendments to the Claims:

This listing of claims will replace all prior versions and listing of claims in the application; where claims are cancelled, they are cancelled without prejudice.

5

Claim 1 (cancelled).

Claim 2 (cancelled):

10 Claim 3 (cancelled):

Claim 4 (cancelled).

15 Claim 5 (currently amended): A method for disabling a vehicle comprising the steps of:
electrically connecting a radio receiver to a vehicle ignition control computer;
programming the vehicle ignition control computer to disable the vehicle when a disablement radio signal is received, or in the absence of receiving
20 any radio signal by the radio signal receiver; and
programming the vehicle computer to disable the vehicle when the radio receiver is electrically disconnected from the vehicle computer.

25 Claim 6 (currently amended): The method of Claim 5 wherein the step of electrically connecting a radio receiver to [a] the vehicle ignition control computer comprises connecting a radio receiver to a diagnostic port on [a] the vehicle ignition control computer receiver.

Claim 7 (currently amended): The method of Claim 5 wherein the step of electrically connecting a radio receiver to [a] the vehicle ignition control computer comprises:

5 detaching a vehicle interface harness from a vehicle interface connector;
 connecting a radio receiver to the vehicle interface connector; and
 attaching the vehicle interface harness to the radio receiver.

Claim 8 (currently amended): The method of Claim 5 wherein the step of electrically connecting a radio receiver to [a] the vehicle ignition control
10 computer comprises integrating a radio receiver into a vehicle computer.

Claim 9 (currently amended): The method of Claim 5 wherein the step of programming the vehicle ignition control computer comprises:
15 attaching a programming device to a diagnostic port on the vehicle ignition control computer;
 conveying firmware to the vehicle ignition control computer that is capable of disabling the vehicle when a signal is received or not received from the radio receiver; and
 storing said firmware in the vehicle ignition control computer.

20

Claim 10 (cancelled).

Claim 11 (currently amended): A vehicle disablement system comprising:
radio receiver capable of being electrically connected to a vehicle ignition
25 control computer; and
 firmware, that when executed by a processor in the vehicle ignition control computer, causes the processor to disable the vehicle when a disablement radio signal is received by the radio receiver or when the radio receiver fails to receive an enablement signal and wherein the
30 firmware further is capable of causing the processor to sense the

presence of the radio receiver and is further capable of causing the
processor to disable the vehicle when the radio receiver is not present.

5 Claim 12 (currently amended): The vehicle disablement system of Claim 11
 wherein the radio receiver comprises an interface capable of electrical
 connection to a diagnostic port of [a] the vehicle ignition control computer.

10 Claim 13 (currently amended): The vehicle disablement system of Claim 11
 wherein the radio receiver comprises:
 an interface capable of connecting to a vehicle interface connector; and
 an interface capable of connecting to a vehicle interface harness.

Claim 14 (cancelled).

15 Claim 15 (cancelled).

Claim 16 (cancelled).

20 Claim 17 (cancelled).

25 Claim 18 (new): A vehicle disablement system comprising:
 radio receiver capable of being electrically connected to a vehicle ignition
 control computer; and
 firmware, that when executed by a processor in the vehicle ignition control
 computer, causes the processor to sense the presence of the radio
 receiver and is further capable of causing the processor to disable the
 vehicle when the radio receiver is not present.

Appl. No. 10/620,307

Amendment Date: June 5, 2006

Reply to Office Action of March 3, 2006

Claim 19 (new): The vehicle disablement system of Claim 18 wherein the radio receiver comprises an interface capable of electrical connection to a diagnostic port included in the vehicle ignition control computer.

- 5 Claim 20 (new): The vehicle disablement system of Claim 18 wherein the radio receiver comprises:
- an interface capable of connecting to a vehicle interface connector; and
 - an interface capable of connecting to a vehicle interface harness.
